Progression

The department requires at least 2.5 in all computer engineering, computer science, electrical engineering, and mathematics courses used for the undergraduate degree. SCE 151 requires a C or better in ENGL 101 or Math 150A/B/C.

Progression of departmental undergraduate students to the upper-division programs of the department is competitive and is based on the space available in the department. Factors considered in the decision include overall grade point average, grades earned in courses required in the lower division curricula of the department and College of Engineering, and seriousness of purpose and interest in departmental programs, as exemplified by regular and steady progress through the junior level curriculum as well as adherence to withdrawal and course repeat policies.

Students also have opportunities for an Honors Concentration and/or a five year BS/MS program. See the Undergraduate Catalog for details and requirements.

Volunteer Core courses highlighted in light orange.
