

ITE Engineers Day Competition Fall 2025

Mini Metro

Mini Metro is an online, puzzle game which focuses on constructing an efficient rail transit network for a rapidly growing city. Participants will play levels attempting to obtain the highest score.

Participants will be allowed to play a maximum of 5 rounds each. Their highest score will be recorded with their name and school. At the end of the day, there will be an overall winner with the highest score and a school with the highest score.

Note: I-pads will be provided to participants to complete the online game for this competition.
